EDUCATION

Wilfrid Laurier University
Candidate for Bachelor of Computer Science
2025
Major GPA : 3.9

SKILLS

PROGRAMMING: Java, Python, TypeScript, C++, Bash, SQL, R
TOOLS/FRAMEWORKS: React, Firebase, Git, Django, Postgres, PyTorch, AR Studio, Next.js
OTHER SKILLS: Photoshop, Figma, Blender, Wireframing, Consulting, Content Creation

EMPLOYMENT

ONOVA
Software Engineer Intern   **Nov. 2023 to Current**
- Spearheaded the development of PokerGPT, an AI-powered Poker Coach, leveraging advanced **LLMs** and sophisticated **prompt engineering**. Launched and optimized the backend model, including integration of solver functionalities, achieving a user base of over **1000+** within the first month.
- Developed and enhanced Earth, a comprehensive hackathon management platform, implementing authentication, submission, and admin workflows. Successfully managed **two major hackathons**, Capgemini x Google and Capgemini x Microsoft, attracting over **4000** participants, marking it as one of the largest internal corporate Gen AI hackathons.

WERKIT
Software Engineer Intern   **June 2021 to Dec. 2022**
- Developed automation scripts using **JavaScript** and **REST APIs** that streamlined internal operations such as tracking client activity, automating email dispatches, generating contracts and ensuring a streamlined workflow between Google Sheets and **AWS** which eased sourcing by **49%**
- Created a client portal with **Bubble.io** for direct service access, emphasizing secure user authentication.
- Integrated a payment tunnel to facilitate mass payouts to over **5000+** users and built a Discord Bot using NodeJS to establish a knowledge base and user community.

ACORN BIOLABS
Data Science Intern   **Sept. 2020 to Dec. 2020**
- Constructed a dashboard to monitor user/sales metrics, amplifying user engagement with tailored marketing campaigns, yielding a **15%** surge in interactions.
- Pioneered **HubSpot API workflows** for flawless integration with platforms such as Calendly and Shopify, as well as, automated and optimized workflows using Zapier and Python, significantly improving operational efficiency.
- Crafted an instructional video for the stem cell home collection kit, which was viewed by **over a thousand clients.**

APOLLO NEUROSCIENCE
Machine Learning Intern   **June 2020 to Sept. 2020**
- Conducted a research project studying sleep data derived from **hundreds of users.**
- Analyzed the impact the Apollo Wearable had on user sleep quality, improving **sleep score by 46%** using advanced analytics.
- Utilized techniques like **K-means clustering, Principal Component Analysis**, and **Correlation matrices** to derive statistical conclusions, enhancing product functionality by **20%**.
- Designed visualizations using tools like **Figma, Canva,** and **Photoshop**, resulting in a **10%** increase in user comprehension.

PROJECTS

PERSONALIZED VIRTUAL ASSISTANT
- Engineered a versatile virtual assistant using advanced open-source libraries and APIs in Python, leading to a **20%** efficiency improvement in daily tasks.
- Seamlessly integrated diverse functionalities, including email dispatch, real-time stock prices, game scores retrieval, Spotify synchronization, speed tests, real-time weather updates, and the ability to handle intricate computational and mathematical challenges.

NETFLIX CLONE
- Conceptualized and crafted a web application replicating the essential features and functions of Netflix, capturing over **1,000** user engagements within the first month.
- Orchestrated the frontend development with **React JS**, employing **Firebase** and TMDB for accurate movie data retrieval.

REAL-TIME FACE MASK DETECTOR
- Developed a state-of-the-art object detection application capable of instantaneously discerning mask usage, bolstering safety compliance by **30%** in tested environments.
- Utilized the Object-Detection API and **TensorFlow** framework to proficiently train the SSD-mobile net neural network using a dataset of **300+** images, achieving a detection accuracy rate of **95%**.

COVID-19 TRACKER
- Established a dynamic web application designed to showcase real-time global data on COVID-19 cases, deaths, and recoveries, which became a primary source of information for **5,000+** users.
- Focused on frontend development harnessing React JS, integrated with Firebase, and collaborated with Disease.sh API to ensure up-to-date and accurate data retrieval.
